

A.Y 2025-26(Odd Sem)

Date: 12/12/25

Report on PSR Activity: Super AI Community Stakeholder Connect

Objective:

The objective of these activities is to strengthen students' competencies in Artificial Intelligence (AI) and Machine Learning (ML) by offering expert-led sessions on Agentic AI, blockchain applications, evolving roles of data scientists, and placement guidance, along with aptitude tests and hands-on workshops that develop logical reasoning, quantitative skills, and practical implementation abilities. Through this blend of conceptual learning, peer-to-peer interaction, and real-world exposure to tools and technologies, students will enhance their technical proficiency, communication skills, and career readiness for opportunities in industry, research, and emerging AI-driven domains.

Following activities are done during Academic Year 2025-26 Odd Semester:

Activity 1: Aptitude Test 1 - Skill Development.

Date: 13 July 2025

Time: 5:00 PM to 5:30 PM

Participants: ST and TT Students

Objectives:

- To simulate a competitive exam environment and provide feedback.
- To identify areas of improvement in quantitative, verbal, and logical reasoning.
- To prepare students for upcoming technical and competitive assessments.

Description:

The aptitude test aimed at assessing students' problem-solving and reasoning skills, focusing on analytical questions that simulate competitive exams. The test covered areas such as logical reasoning, quantitative aptitude, and verbal ability. It was structured with time constraints to prepare students for real-world exam scenarios. After the test, students were given feedback and strategies for improving their performance in future assessments.

Activity Photo:

There are 3 boxes, 1 contains only apples, 1 only oranges, and 1 has a mix of both. * 1 point

All are labeled wrongly.

If you pick 1 fruit from the box labeled "Mixed", and it's an apple, what is the correct label for that box?

- ☐ Apples
☐ Oranges
☐ Mixed

Find the next term in the series: *
3, 8, 15, 24, 35, ?

1 point

- ☐ 46
☐ 48
☐ 50
☐ 54

Participation Analysis:

Sr. No.	Class	No. of Students
1	ST	103
2	TT	18
Total:		121

Feedback Analysis:

Outcome:

The test helped students identify areas for improvement in their aptitude and logical reasoning skills. Feedback was provided, highlighting common mistakes and strategies for better performance. The test also fostered a spirit of healthy competition among peers, motivating students to enhance their problem-solving abilities.

PO Attained: PO2, PO9, PO11

Activity 2: Session 1 on Agentic AI with CrewAI, LangGraph & LangFuse.

Date: 19 July 2025

Time: 7:00 PM to 9:00 PM

Speakers: Ankit Mishra, Alumni & Industry Expert, ML Engineer [Pibit.ai](#)

Participants: ST and TT Students

Objectives:

The session aimed to:

- Introduce students to advanced concepts in Agentic AI using tools such as CrewAI, LangGraph, and LangFuse.
- Provide hands-on exposure to designing and deploying AI agents for real-world automation use cases.
- Encourage collaborative learning, innovative thinking, and networking with peers and industry experts.
- Motivate students to explore AI/ML career paths and projects focused on agent-based systems

Description:

This online session, held under the Super AI Community Stakeholder Connect initiative, focused on “Agentic AI with CrewAI, LangGraph, and LangFuse – Session 2” and was delivered by an industry expert. The event combined conceptual discussions with live demonstrations, showcasing how agentic workflows are built, orchestrated, and applied in practical scenarios, along with opportunities for idea sharing and community interaction.

Activity Photo:

Participation Analysis:

Sr. No.	Class	No. of Students
1	ST	65
2	TT	21
Total:		86

Feedback Analysis:

Outcome:

Students gained a clear introduction to Agentic AI concepts and workflows using CrewAI and LangGraph, including how agents are structured and orchestrated for practical tasks. The session built foundational confidence in using these tools and sparked interest in further exploring agent-based projects and collaborations within the community.

PO Attained: PO1, PO2, PO5, PO11

Activity 3: Aptitude Test 2 - Skill Development.

Date: 3 August 2025

Time: 05:00 AM to 05:30 PM

Participants: ST, TT Students.

Objectives:

- To simulate a competitive exam environment and provide feedback
- To identify areas of improvement in quantitative, verbal, and logical reasoning.
- To prepare students for upcoming technical and competitive assessments.

Description:

The aptitude test aimed at assessing students' problem-solving and reasoning skills, focusing on analytical questions that simulate competitive exams. The test covered areas such as logical reasoning, quantitative aptitude, and verbal ability. It was structured with time constraints to prepare students for real-world exam scenarios. After the test, students were given feedback and strategies for improving their performance in future assessments.

Activity Photo:

In a certain code language, if 'WATER' is coded as 'XBUFS', how would 'FIRE' be coded in the same language? *

- ☐ GJSF
- ☐ GJSE
- ☐ GISE
- ☐ HGQE

Pointing to a woman in a photograph, Rohit said, "She is the only daughter of the father-in-law of my only son." How is the woman related to Rohit? *

- ☐ Daughter
- ☐ Wife
- ☐ Sister
- ☐ Mother

Participation Analysis:

Sr. No.	Class	No. of Students
1	ST	65
2	TT	20
Total:		85

Feedback Analysis:

Insights

Outcome:

The aptitude test aimed at assessing students' problem-solving and reasoning skills, focusing on analytical questions that simulate competitive exams. The test covered areas such as logical reasoning, quantitative aptitude, and verbal ability. It was structured with time constraints to prepare students for real-world exam scenarios. After the test, students were given feedback and strategies for improving their performance in future assessments.

PO Attained: PO2, PO9, PO11

Activity 4: Session 2 on Agentic AI with CrewAI, LangGraph & LangFuse.

Date: 10 August 2025

Time: 5:00 PM to 7:00 PM

Speakers: Ankit Mishra, Alumni & Industry Expert, ML Engineer [Pibit.ai](https://pibit.ai)

Participants: ST and TT Students

Objectives:

The session aimed to:

- To deepen students' understanding of Agentic AI by extending concepts introduced in Session 1 with more advanced use of CrewAI, LangGraph, and LangFuse.
- To provide focused, hands-on practice in designing, debugging, and refining multi-agent workflows for real-world automation scenarios.

Description:

This online session, conducted as “Agentic AI with CrewAI, LangGraph, and LangFuse – Session 2,” revisited key ideas from the first session and then moved into advanced patterns such as complex agent

chains, monitoring, and optimization using LangFuse. Through demonstrations, discussions, and Q&A, participants explored richer use cases and learned practical techniques to make agent systems more reliable and scalable.

Activity Photo:

Participation Analysis:

Sr. No.	Class	No. of Students
1	ST	49
2	TT	16
Total:		65

Feedback Analysis:

How confident do you feel in applying CrewAI, LangGraph or LangFuse after this session?

41 responses

 Copy chart

Outcome:

Participants strengthened their conceptual and practical grasp of Agentic AI, gaining the ability to design more sophisticated, end-to-end agent workflows with CrewAI, LangGraph, and LangFuse. The deeper dive encouraged students to plan advanced projects, consider hackathons or research work in agentic systems, and engage more actively with the Super AI community.

PO Attained: PO1, PO2, PO5, PO11

Activity 5: Peer-to-Peer Learning session on Blockchain

Date: 24 August 2025

Time: 1:00 PM to 2:30 PM

Mode: Online

Speakers: Priyanshu Sah & Aadil Rayeen

Maximum no of participants: 75 Participants

Participants: ST and TT Students

Objectives:

- To introduce students to the basic concepts of blockchain.
- To explain how blockchain improves trust and transparency.
- To promote peer-to-peer knowledge sharing on emerging technologies.
- To discuss real-life applications of blockchain in different sectors.

Description:

An exclusive peer-to-peer learning session was organized to help students understand how blockchain technology is revolutionizing the digital world. The session focused on **redefining trust and transparency** through decentralized systems that eliminate the need for intermediaries. Participants explored how data stored on a blockchain remains secure, immutable, and verifiable, making it one of the most reliable technologies of the future.

During the session, students explained key concepts to each other in a simplified manner, creating an engaging and interactive learning environment. Real-life use cases—such as cryptocurrency transactions, supply-chain tracking, secure digital identities, and transparent record-keeping—were discussed to highlight the practical relevance of blockchain.

The activity encouraged active participation, collaborative thinking, and knowledge sharing, enabling students to gain clarity about how blockchain works and why it is considered a groundbreaking technology for trust-based systems. This peer learning approach also helped build confidence in communicating technical concepts and enhanced teamwork within the group.

Activity Photo:

Participation Analysis:

Sr. No.	Class	No. of Students
1	ST	49
2	TT	14
Total:		63

Feedback Analysis:

1. How effective were the visual aids or resources (e.g., slides, codes, demos) used by the speakers in enhancing your understanding?

37 responses

4. How confident do you feel in understanding and applying blockchain basics and mining concepts after this session?

37 responses

Outcomes :

- Participants left with a solid understanding of how blockchain secures transactions, how mining puzzles are generated and solved, and how decentralized ledgers foster digital trust.
- Several attendees requested further learning references and appreciated the straightforward, visual explanations.

PO Attained: PO1, PO2, PO5, PO8, PO11

Activity 6: Evolving Roles of Data Scientists & ML Engineers in the AI Era

Date: 30th August 2025

Time: 10:00 AM - 12:45 PM

Mode: Online (Zoom)

Speaker: Madhura Raut (Principal Data Scientist, Workday | 9+ yrs ML Experience | 2 U.S. Patents | IEEE Senior Member | KDD 2025 Keynote Speaker)

Participants: ST and TT Students

Objectives:

- To explain how the roles of Data Scientists and Machine Learning Engineers are changing with the rapid growth of AI.
- To highlight new skills, tools, and responsibilities required in modern AI-driven industries.
- To make students aware of emerging career opportunities and trends in data and AI fields.
- To promote understanding of how automation, generative AI, and advanced analytics are reshaping technical job profiles.

Description:

A focused knowledge-sharing session was conducted on the topic **“Evolving Roles of Data Scientists & ML Engineers in the AI Era.”** The session explored how the advancements in artificial intelligence, big data, and automation are transforming traditional job roles. Students learned how Data Scientists are moving beyond data cleaning and analysis towards strategic decision-making, responsible AI development, and domain-focused insights.

Similarly, the session highlighted how Machine Learning Engineers are now expected to work on scalable model deployment, MLOps pipelines, continuous monitoring, and integrating generative AI into real-world systems. The discussion covered the growing importance of skills such as cloud computing, prompt engineering, LLM fine-tuning, and ethical AI considerations.

Through this interactive session, students gained a deeper understanding of the dynamic nature of AI-driven careers and how they can prepare themselves to stay relevant and industry-ready.

Activity Photo:

Participation Analysis:

Sr. No.	Class	No. of Students
1	ST	57
2	TT	18
Total:		75

Feedback Analysis:

2. How helpful were the tips and strategies shared for technical rounds and resume building?

16 responses

Outcomes :

- Participants gained an understanding of the latest trends and skills needed in AI and ML.
- The Q&A session provided practical guidance on interviews, skill development, and industry readiness.
- Students showed great interest in further resources, upskilling, and staying linked with the Super AI Club.

PO Attained: PO1, PO6, PO11

Activity 7: An Exclusive session on Capegemini Placement Guidance

Date: 14 September 2025

Time: 06:00 PM - 08:00 PM

Mode: Online (Zoom)

Speaker: Shrikar Gaikar & Drashti Panchal, Alumni and Industry Expert

Participants: ST and TT Students

Objectives:

- To provide students with insights into Capgemini's placement process and recruitment expectations.
- To guide students on the skills, preparation strategies, and interview techniques required to crack Capgemini.
- To familiarise students with aptitude rounds, group discussions, and technical interview patterns.
- To help students understand how to build a strong resume and present themselves effectively during placement.

Description :

An exclusive session was conducted to guide students on Capgemini's placement process and the skills needed to succeed in campus recruitment. The speaker explained the complete selection procedure, including the online assessment, communication test, technical rounds, and HR interview. Students were given practical tips on improving aptitude speed, strengthening core technical subjects, and preparing for Capgemini's unique game-based evaluation.

The session also covered resume-building, communication skills, and common mistakes candidates make during interviews. Real examples and experiences were shared to give students a clear idea of what Capgemini looks for in potential hires. The interactive nature of the session allowed students to clarify their doubts and gain confidence in preparing for future placement drives.

Activity Photo:

Participation Analysis:

Sr. No.	Class	No. of Students
1	ST	52
2	TT	15
Total:		67

Feedback Analysis:

4. How helpful were the tips and strategies shared for technical rounds and resume building?

21 responses

5. Was the length of the session appropriate?

21 responses

Outcomes :

- Students gained a clear understanding of Capgemini's placement rounds and evaluation criteria.
- Participants learned effective strategies for aptitude preparation, technical interviews, and communication tests.
- The session helped students improve their resume-building and interview presentation skills.
- Students became more confident and better prepared for upcoming placement drives.

PO Attained: PO8, PO9, PO10, PO11

Activity 8: Hands-On Workshop on IoT x ML

Date: 09 October 2025

Time: 03:15 PM - 05:15 PM

Mode: Offline

Venue : Lab 307

Speaker: Mrs.Poonam Gawade - Founder Tantraniketan

Participants: ST and TT Students

Objectives:

- To introduce students to the evolution of IoT from IoP (Internet of People) to modern interconnected systems.
- To help students understand real-life IoT applications and encourage brainstorming for innovative use cases.
- To provide clarity on the IoT implementation flow—from hardware to connectivity to AI/ML integration.
- To create awareness about IoT manufacturing challenges in India, including semiconductor issues.
- To motivate students toward hands-on learning by offering opportunities for real-world IoT exposure.

Description :

The session began with an introductory talk by the speaker, **Mr. Nitin**, who provided a clear overview of the evolution of IoT, starting from the earlier concept of the Internet of People (IoP) to the modern Internet of Things (IoT). He discussed how IoT has grown into a powerful ecosystem connecting devices, data, and intelligence.

To engage the audience, he asked students to share real-life IoT applications they were familiar with. This led to active brainstorming, helping students expand their thought process, creativity, and innovative abilities. The speaker further showcased a video demonstrating a highly advanced IoT-enabled environment where everything from streetlights to home appliances, refrigerators to doors, and chimneys to room systems operates seamlessly through interconnected smart devices.

Mr. Nitin also explained the complete flow of implementing IoT systems, starting from the **hardware layer**, moving to **IoT connectivity**, and finally integrating **AI/ML models** for intelligent automation. He highlighted important insights about IoT manufacturing, comparing the industry landscape of India and China. He also discussed the semiconductor manufacturing challenges in India, the impact of weather conditions on hardware production, and how these issues are addressed by importing semiconductor wafers.

Towards the end, the speaker invited interested students to visit his office in Malad West for further hands-on learning and deeper discussions. He encouraged small groups of 4–5 students to interact, explore IoT applications, understand integration processes, and gain practical exposure.

Activity Photo :

Participation Analysis:

Sr. No.	Class	No. of Students
1	ST	21
2	TT	14
Total:		35

Feedback Analysis:

8. Which segment did you find most useful?

4 responses

- Applications of IoT
- Information about Different Sensors
- Practical Showcasing of Equipments and Devices
- Q&A Session

5. Was the length of the session appropriate?
4 responses

Outcomes :

- Students gained a clear understanding of how IoT has evolved and where it stands today.
- Participants were able to identify and discuss real-world IoT applications, enhancing their creative thinking.
- Students understood the complete IoT workflow and how AI/ML adds intelligence to IoT systems.
- Participants learned about manufacturing differences between India and China and semiconductor-related challenges.
- Students received an opportunity for deeper practical exposure through the speaker's invitation for further learning.
